RAKESH KUMAR

Frontend / Full Stack Web Developer

Jaipur, Rajasthan | +91 9549325573 | rakeshtailor725@gmail.com

LinkedIn: linkedin.com/in/rakeshkumar360 | GitHub: github.com/rakeshparihaar12

PROFESSIONAL SUMMARY

Aspiring Full Stack Web Developer skilled in HTML, CSS, JavaScript (ES6+), React.js, Tailwind CSS, and Python. Experienced in building responsive, component-based web applications, including a role-based task management system with authentication and state management, and an AI-integrated Google Gemini UI clone using the @google/genai SDK. Strong problem-solving foundation built through consistent DSA practice on LeetCode and GeeksforGeeks, along with solid communication and adaptability skills and a passion for modern, user-focused web development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python

Frontend: HTML5, CSS3, React.js, React Hooks (useState, useEffect), Context API, Tailwind CSS, Responsive Web Design

Tools & Platforms: Vite, Git, GitHub, Google GenAI SDK, LocalStorage, VS Code, Netlify

PROJECTS

Employee Task Management System

Personal Project

React.js, JavaScript (ES6+), Tailwind CSS, Context API, Vite | Role: Frontend Developer | Live Demo: employeestaskmanage.netlify.app

- Built a role-based task management web app with separate Admin and Employee dashboards.
- Implemented Admin and Employee login/logout flows using React state and LocalStorage.
- Developed an Admin interface to create tasks and assign them to employees, with employee-side tracking across New, Active, Completed, and Failed states.
- Used Context API to share employee and task data across components, reducing prop drilling, and applied immutable state updates for nested task data.
- Built controlled forms with conditional rendering based on user role and task status, using a reusable, responsive Tailwind CSS component architecture.

Google Gemini AI Clone

Personal Project

React.js, Google GenAI SDK, JavaScript (ES6+), Context API, CSS3, Vite | Role: Frontend & AI Integration Developer | Live Demo: newgeminiclone.netlify.app

- Built a responsive full-stack UI clone of the Google Gemini web client, integrating the official @google/genai SDK to interact with the Gemini 3.8 Flash model in real time.
- Designed global state management using React Context API to handle text input, prompt history, loaders, and chat state across components.
- Engineered a custom dynamic typography engine to parse API responses, format markdown syntax, and stream text with a timed async typing effect replicating Gemini's UI.
- Rebuilt legacy CSS into responsive Flexbox/Grid layouts with fluid breakpoints for consistent UX across desktop and mobile.
- Secured API credentials using Vite environment variables and deployed the application on Netlify with GitHub-based version control.

CODING PROFILES & PROBLEM SOLVING

LeetCode: Solved 312+ quality DSA problems, consistently practicing data structures, algorithms, and problem-solving patterns.

GeeksforGeeks: Coding score of 346, reflecting regular practice in DSA and competitive problem-solving.

EDUCATION

Bachelor of Computer Applications (BCA) — 2024 - 2026
Tirupati College of Technical Education — **CGPA: 7.35**

12th (Commerce), RBSE — 2023
Govt. Sr. Sec. School, Jaswantpura — **82.66%**

10th, RBSE — 2021
Govt. Sr. Sec. School, Jaswantpura — **97.00%**

SOFT SKILLS

Communication | Problem Solving | Critical Thinking | Adaptability | Time Management | Creativity
